

Delegation from Liberian National Bureau of Concession Visits GSA

Group picture of NBC delegation with top management members of GSA

A delegation from the Liberian National Bureau of Concession (NBC), on Wednesday, February 15, 2023, paid a visit to the Ghana Standards Authority (GSA).

The NBC is an agency of the Liberian government responsible for monitoring and evaluating compliance with concession agreements in collaboration with concession entities. It serves as a source of technical expertise to support all aspects of concession processes.

The visit was, among other things, to discuss and learn from Ghana's vast experience in the production, processing

and packaging of oil palm and its derivatives.

The discussions also included an alternative sustainable approach for the livelihood of people in oil palm production communities.

The Liberian delegation also inquired about policy frameworks, funding, implementation, and sustainability issues related to oil palm processing.

The visit and discussions were facilitated by the United Nations World Food Programme (WFP).

Other members of the delegation included Directors from the Liberia Land Authority; Ministry of Finance Development and Planning; WFP Liberia; UN Women and UNDP.
