

GSA Enforcement Team Shuts Down Mattress Factories over Production of Substandard Products

The GSA has shut down several factories in Afienya, and Dawhenya for producing substandard mattresses and other products that fail to meet national standards.

The closures followed laboratory tests conducted by the Authority, which revealed that materials and

finished goods at multiple sites, including mattresses and related products, did not comply with approved specifications.

The affected companies, primarily mattress manufacturers, include ZXZ Company Limited; Bright Home Company Limited; A5

Homes Company Limited; Hua Sheng Garment Company Limited; and Jim Yuan Jia Company Limited. They remain closed pending further action by the Authority.

During the operation, GSA officials seized large quantities

Mr. Anti engaging a factory worker on the sanctions of producing substandard products

of uncertified products and placed them under lock and key. The Authority is currently determining the next steps, which may include destroying items that cannot be safely repurposed.

Explaining the rationale for the shutdowns, Head of Special Projects at GSA, Mr. George Anti, said some factories had recently started using materials that deviated from approved specifications and were operating without the necessary licences.

“We sent our team undercover to obtain samples through market purchases and factory visits. The tests confirmed that the products are substandard,” he said.

Mr. Anti stressed that, as the national body mandated to protect consumers and facilitate trade, the GSA could not guarantee the safety of products being mass-produced.

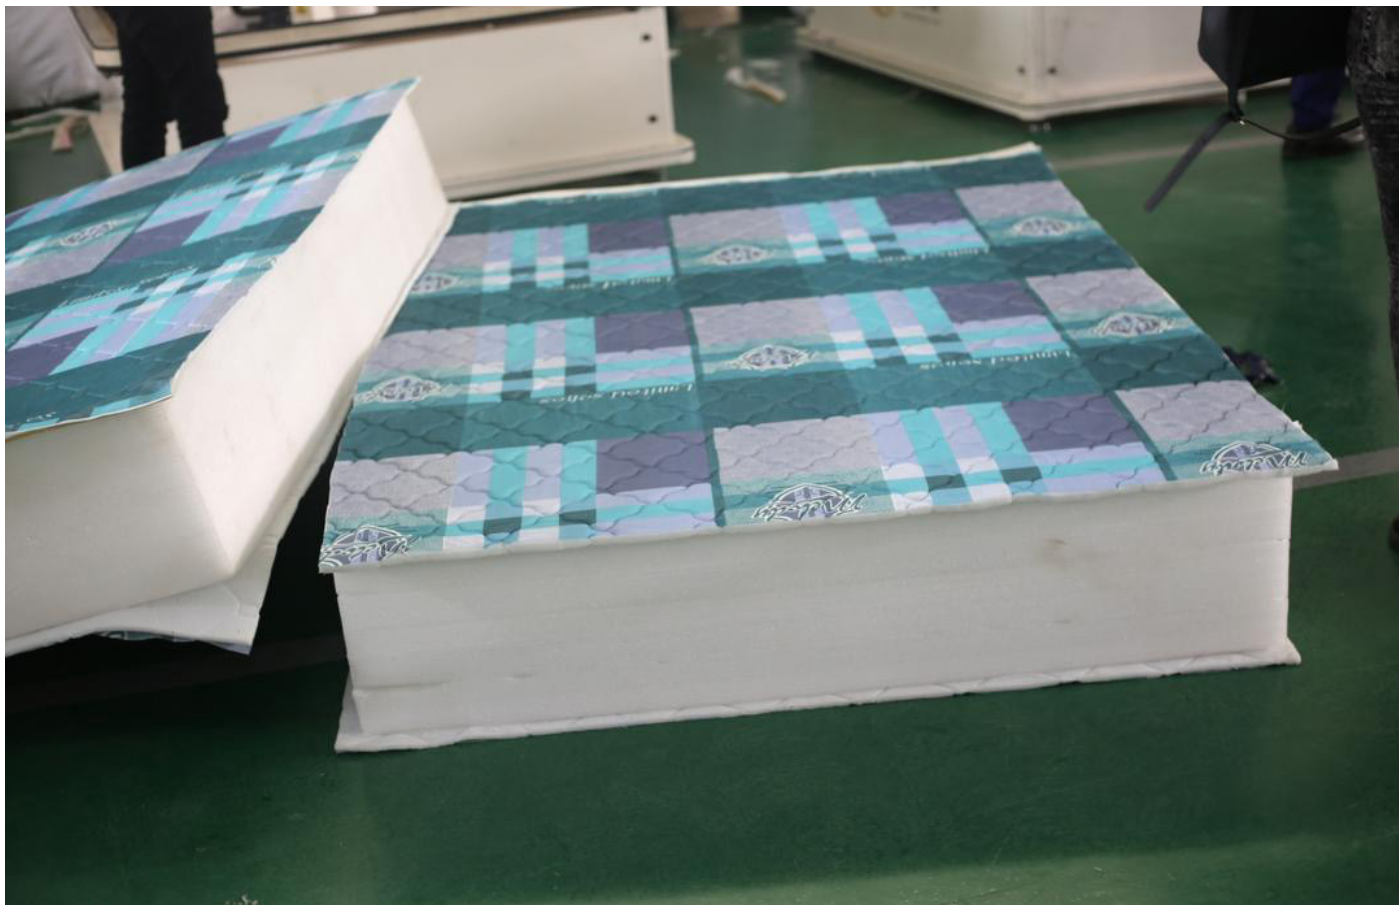

“We cannot tell, as an independent body, whether these products that they are putting out there in the thousands are safe to use, which is the most important thing, or fit for purpose,” he noted.

He further disclosed that the Authority had previously engaged some of the companies, at the Ministry of Trade level, to help them regularise operations. However, several companies

remained adamant and continued to flout the law.

“For as long as they want to keep doing the wrong thing, they will remain shut,” Mr. Anti added.

While emphasising that Ghana remains open for business, he stated that the GSA would support only genuine and responsible enterprises that protect the health and safety of consumers.

Deputy Trade Minister (middle) and other agency heads taking an oath

Deputy Trade Minister Leads Agencies to Public Accounts Committee

The Deputy Minister for Trade, Agribusiness and Industry, Hon. Sampson Ahi, on behalf of the sector minister, on Monday, October 27, 2025, led some key agencies under the Ministry, including the Ghana Standards Authority (GSA), to appear before the Public Accounts Committee (PAC) of Parliament to respond to questions on their financial statements and operational performance.

The session focused on the financial accountability of the agencies, their strategic directions, and broader issues within the Ministry's purview, such as the management of

government-initiated youth factories and salary concerns at the National AfCFTA Coordination Office (NACO).

During GSA's turn, the committee stated that they didn't have too many concerns with the Authority's financial performances except a travel and staff compensation infraction which was clarified by Mr. Samuel Sackitey, the Acting Director of Finance.

The Chairperson of the PAC, Hon. Abena Osei Asare, in her concluding remarks, commended GSA for its judicious use of its funds without any major infraction and noted that the GSA was

one of the key agencies in the countries and appealed to the government to help improve and promote the institution.

Trade Minister in a group photograph with members of COGMAG

Trade Minister Charges GSA to Ensure Only Licensed Manufacturers, Importers Operate in the Market

The Minister for Trade, Agribusiness and Industry, Hon. Mrs. Elizabeth Ofosu-Adjare, has charged the GSA to ensure compliance and to make sure that only licensed manufacturers and importers operate in the market, emphasising the importance of quality control and fair competition.

She made this known during a meeting with the Chamber of Cement Manufacturers Ghana (COGMAG) last month.

Hon. Ofosu-Adjare also commended the Ghana Revenue Authority (GRA) and the GSA for their efforts so far in controlling the smuggling of cement at the borders and urged the Authority to work assiduously in curbing the menace of smuggling and illegal importation.

“I want the Ghanaian brand to adhere to standards in order to obtain the moral right in curbing invaders,” she stated.

The Minister bemoaned the activities of some individuals and companies engaged in the illegal importation of cement into the Ghanaian market and stressed that, as a matter of urgency and necessity, such illegalities must cease.

Ing. Akpaloo demonstrating the new app to an electrical dealer

GSA Educates Cable Manufacturers, Dealers in Kumasi on New Digital Conformity Mark App

The GSA, on Wednesday, October 29, 2025, sensitised electrical cable manufacturers

and dealers in Kumasi on the new Digital Conformity Mark App.

They were educated on the importance of the new app and the need for them to

collaborate with the Authority to ensure that consumers and citizens are able to identify quality and certified cables on the market.

Ing. Francis Mensah Akpaloo, Project Manager of the Digital Conformity Project, speaking at the sensitisation programme organised for electrical cable manufacturers and dealers, explained that the unique codes were generated by the programme managers, not manufacturers, with activation tied to the volume of products released onto the market.

He noted that the system incorporated advanced security features to prevent duplication or falsification of the labels, ensuring that only genuine products bearing the GSA's approval reached consumers.

He added that the project is currently being piloted but will be rolled out nationwide next year to ensure that only quality products are available on the market for the benefit of consumers.

Dr. Samuel K. Frimpong, the Ashanti Regional Manager of the GSA, said the project goes beyond protecting consumers from inferior products. It also seeks to promote fair competition and create a level playing field for genuine manufacturers.

He added that the initiative would strengthen the credibility of the Ghanaian market, boost consumer confidence, and enhance enforcement of national standards.

Dr. Samuel Frimpong, Ashanti Regional manager addressing participants at the sensitisation programme

“The system provides the GSA with real-time visibility into the market, making it easier to identify, track, and remove non-compliant products,” Dr. Frimpong emphasised.

The launch brought together key stakeholders, including electrical cable manufacturers, electrical contractors, and consumer representatives.

The digital conformity mark is a digital app/code that authenticates a product’s compliance with quality and safety standards, providing consumers with a verifiable way to identify genuine goods.

It serves as a tool to fight counterfeits, protect consumers, and ensure a fair market by integrating with digital technologies, often using barcodes to link to a unique digital record of the product’s certification.

GSA, LEEP, Hold Workshop to Strengthen Enforcement on Ghana's Lead Paint Standard

The Lead Exposure Elimination Project (LEEP) – a UK-based non-profit organisation that works to eliminate childhood lead poisoning by phasing out lead in paint – in conjunction with the GSA, has held a two-day workshop on lead paint monitoring and enforcement.

The workshop, which took place from Wednesday, October 29 to Thursday, October 30, 2025, at the GSA head office in Accra, was aimed at strengthening

capacity and coordination on lead paint monitoring and enforcement in Ghana.

It attracted staff from the GSA and the Environmental Protection Agency (EPA) and included presentations from LEEP and the GSA on the health and environmental harms of lead, factory inspection and open market sampling, lead paint analysis, and group discussions on manufacturer engagement and enforcement.

Yujin Han, a Programme Manager at LEEP, and Dr. Scott Matafwali, a LEEP Programmes Manager for Kenya, Tanzania, and Uganda, served as resource persons for the training, while Dr. Paul Osei Fosu, Head of the Food and Agriculture Department at the GSA, coordinated the sessions.

Mr. Francis Kojo Eshun, the Director of Testing, welcomed participants to the workshop and encouraged everyone to participate fully to ensure that

they are well resourced to carry out future assignments.

“I thank you for availing yourself for the workshop. I have confidence in you, and I know you will do a good job,” he noted.

Yujin, in a brief remark, said that her outfit’s work is only possible through partnerships with agencies like the GSA, which ensures that products, goods and services in Ghana, are not only reliable and of high quality, but most importantly, safe.

She said lead paint remains a significant threat to the health and potential of Ghanaians, particularly children.

“By strengthening compliance monitoring and enforcement, we can ensure that Ghana’s lead paint standard translates into real-world protection – that all paints sold in Ghana are lead-free,” she said.

On day two of the workshop, participants had the opportunity to tour the facilities of BBC Industries, a leading paint producing company in Tema, to conduct a regular audit, and later visited paint retailers in Tema to put into practice the open market sampling techniques for lead paint discussed at the training.

The workshop provided an important room for the enhancement of collaboration among departments and agencies responsible for product safety and regulatory compliance.

Certificates were presented to participants after the

GSA's Francis Kofi Agbagli Called to the Bar

Mr. Francis Kofi Agbagli, a staff at the Human Resource Department of the GSA, has been called to the Ghanaian Legal Bar.

This followed the completion of all the requirements necessary to attain the status of a lawyer in the country.

He joins the enviable list of staff who have achieved a similar feat and he's very enthusiastic and pumped up to help the GSA.

Speaking to the GSA Digest Team, Mr. Agbagli expressed his excitement of completing law school and noted that he will apply everything he has studied to bring honour to the Authority.

Mr. Francis Agbagli completed Political Science and Psychology major in 2012 and went on to gain an MA in Management and Administration in 2019, both from the University of Ghana (UG), Legon. He completed his Bachelor of Laws (LLB) at the UG School of Law in 2023.

Mr. Agbagli noted that his inspiration to study law began during his Business Management class in senior high school, Three Town Secondary School at Denu in the Ketu South Municipality of the Volta Region.

"We worked on case studies that showcased the work of commercial lawyers, which sparked my interest in the

Francis Kofi Agbagli, Esq.

field. This experience inspired me to pursue a career as a commercial lawyer in the future," he stated.

According to him, Law has varied uses which makes one versatile. He intends to apply the knowledge wherever he finds himself. Francis is first, grateful to God for His grace, mercy and favour that spurred him on to complete the programme.

"The next is the GSA. I owe much appreciation to everyone – colleagues, friends and most especially – my former and current bosses. They made this possible.

In addition, my special 'thank you' goes to my seniors at present at the Authority. And Head of Legal, whose early guidance paved way for my admission to the UG School of Law," Lawyer Agbagli added.

GSA officers in a picture with ITFC workers

Northern Regional Office

GSA Conducts Factory Inspection at ITFC for License Renewal

The GSA's Tamale Office on October 22, 2025, conducted a factory inspection at the Integrated Tamale Fruit Company (ITFC) located at Guishie in the Northern Region.

The visit formed part of the Authority's routine monitoring and surveillance activities aimed at ensuring continued compliance with national quality and safety standards.

The inspection focused on assessing the company's production processes, hygiene practices, quality management systems, and product labelling as part of the requirements for the renewal of its product license for dried mango chips.

The team from GSA interacted with the production staff and management of ITFC to verify conformity with the relevant

Ghana Standards and good manufacturing practices.

During the exercise, the inspection team commended management of ITFC for its commitment to maintaining high production standards and encouraged continuous improvement to ensure sustained compliance. The visit also provided an opportunity for the GSA to offer technical guidance on

further enhancing product quality and safety.

The GSA remains dedicated to promoting quality assurance and consumer protection through regular inspections and certification of locally manufactured products, thereby supporting industrial growth and public health in Ghana.

Eastern Regional Office

Eastern Regional Office Sensitises Electrical Cable Dealers

The Eastern Regional Office has embarked on a sensitisation exercise to create public awareness of the region's electrical testing capacity, to raid the markets of substandard products which have infiltrated into the country through unapproved routes.

The purpose of the sensitisation was to engage wholesale and retail dealers of electrical cables on the New Digital Conformity Marking Project, an advanced conformity management system and the use of mobile friendly verification applications.

The team reiterated that the system allows consumers to verify the standard and authenticity of electrical cables in a bid to improve the safety, quality, and integrity of electrical products on the Ghanaian market.

The products were inspected to ascertain if they adhered to the Labelling Requirements (LI 1541), as well as the abuse of the Standard Mark, as per the GSA Certification Mark Rule (LI 662), which prohibits goods manufactured in Ghana without valid license to the use of the mark.

Additionally, the sensitisation served as an opportunity to assess the reception of the programme by consumers

GSA officers engaging electrical cable dealers

and touch on the procedures and processes involved in the implementation and enforcement of the electrical wiring cable testing in the Eastern Region, with a request for samples from vendors for testing.

The exercise forms part of GSA's mandate to protect consumers, ensure fair trading practices, and enforce compliance with national standards and regulations.

GSA officials in a meeting with Wenchi Municipal DCE

Bono Regional Office

GSA Officers Visit MMDCEs, Follow-Up on Verification of Weighing Scales in Wenchi Municipality

As part of preparations for the upcoming cashew season, a team from the Sunyani office (Regional Manageress, Regional Verification Officer, and Administrator) undertook a working visit to all the MMDCEs in the Wenchi Municipality in the Bono Region. The primary objective of these visits was threefold:

Congratulate the Honorable Gloria Opoku Gyamfi on her appointment as Municipal Chief Executive (MCE) assuring her of the Authority's support in ensuring that GSA's presence is felt by ensuring that it supports the government's developmental

agenda in the Municipality and the region at large.

1. To follow up on a directive issued by the Bono Regional Minister regarding the mandatory verification and certification of all weighing scales used in the cashew trade within the region; and
2. To seek the support and collaboration of Wenchi Municipality in ensuring effective implementation and compliance at the district level.

The team was received by the Municipal Chief Executive, Honorable Gloria Opoku

Gyamfi, and members of their Coordinating Council. During the courtesy calls, the team emphasized the importance of scale verification as per the Ghana Standards Act 2022 (Act 1078) as a key quality control measure that promotes fairness and transparency in the cashew value chain. Inaccurate or tampered scales have long been a source of contention between farmers and buyers, often resulting in loss of income and trust.

The team referenced the letter issued by the Bono Regional Minister, which urged all MMDCEs to

collaborate with the Ghana Standards Authority (GSA) and other relevant agencies to ensure that all weighing scales used in the buying and selling of cashew nuts are duly verified and certified before the season officially opens.

The MCE and this team were encouraged to: Facilitate communication and awareness campaigns in their respective districts about the scale verification exercise, with sensitization carried out by the Sunyani office throughout all the General Assembly meetings in the region. Provide administrative support where possible to GSA teams conducting the verification. Ensure that local cashew buyers and aggregators comply with the directive. Report any resistance or non-compliance for appropriate enforcement action.

The MCE expressed their appreciation for the engagement and affirmed their commitment to ensuring a smooth, transparent, and fair trading environment during the upcoming cashew season. Some also proposed organizing stakeholder meetings with buyers, farmers, and traditional authorities to reinforce the message.

The courtesy call served as a timely reminder of the need for multi-stakeholder collaboration to protect the interests of cashew farmers and improve the overall integrity of the trading system in the region.

Ing. Francis Akpaloo (left), Felix Akpaloo, and Mr. Stephen Owusu (with mic) demonstrating the use of the app to the participants

Ashanti Regional Office

GSA Launches Digital Conformity Pilot Programme in Kumasi

The Ghana Standards Authority (GSA) hosted the Kumasi edition of the Ghana Digital Conformity Pilot Project at the SSNIT Auditorium, in Adum on Wednesday, October 29, 2025. The event marked a significant step in GSA's mission to enhance consumer protection and product traceability in the electrical cable industry through digital innovation.

Mr. Stephen Owusu a staff at the Kumasi office welcomed key dignitaries, including the Regional Director of the

Energy Commission, the Regional Manager of the GSA the Project Coordinator for the pilot initiative, and representatives from stakeholder groups such as electrical cable dealers. Their presence underscored the collaborative nature of the initiative and its relevance to both regulatory bodies and market participants.

Dr. Samuel Kofi Frimpong, Regional Manager of GSA, encouraged the participants to take lessons gathered from the event seriously and inform their colleagues about it.

Ing. Francis Mensah Akpaloo, led a detailed presentation on the initiative. He conducted a practical session demonstrating how to download, install, and use the App.

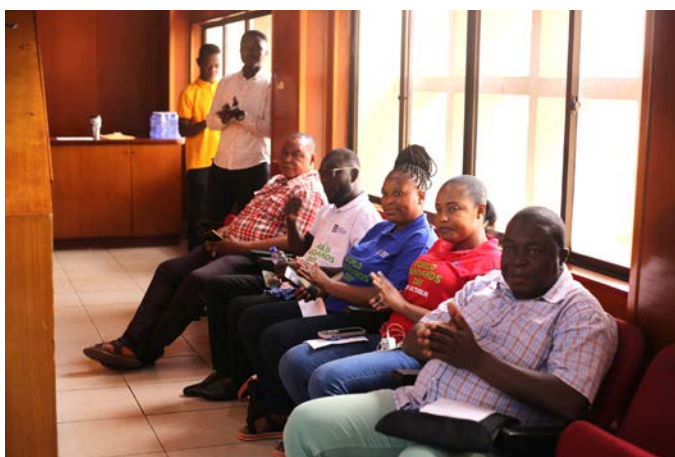

Participants were shown how to scan the GSA QR code and were engaged in live demonstrations of the app's scanning feature and expressed satisfaction with its ease of use and reliability. The interactive session concluded with a question-and-answer segment moderated by Ing. Akpaloo, where attendees

sought clarifications and shared feedback.

Closing remarks were delivered by representatives from the Energy Commission, Ghana Electrical Dealers Association (GEDA), and the Ghana Union of Traders Association (GUTA), who commended GSA for its forward-thinking approach and pledged their support for the project's rollout.

Dr. Samuel Frimpomg, Ashanti Regional manager addressing participants at the sensitisation programme

GSA Conducts 4th Quarter Product Certification Inspections in Ashanti Region

Mr. Xuetao, Engineer/QC (far left); Elian Xueye, Manager's Assistant (far right); Mr Aboagye Dacosta (third from right) with GSA officers

As part of the fourth quarter schedule of product certification inspections, officers from the Kumasi Office of the GSA, Mr. Eugene Antwi-Nuamah and Mr. Richard Appiah, on October 31, 2025, conducted factory inspections at selected manufacturing facilities within the Ejisu Municipality and surrounding areas.

The exercise formed part of GSA's mandate under the Product Certification Scheme (ISO/IEC 17065) to assess the conformity of locally

manufactured goods with relevant Ghana Standards and to provide regulatory and technical support to producers.

The facilities inspected included:

Five Star Carton Manufacturing Company Limited, located at Boankra near Ejisu, producers of fiberboard boxes and corrugated cartons, inspected for renewal of its product certificate, Pura Foam

Solutions Limited, situated at Adako Jachie, manufacturers of foam mattresses and related bedding products, Ejisu Rice Processing Company Limited, based at Donaso near Ejisu, engaged in the processing and polishing of locally milled rice, Akaal Skills Development Academy Limited, located at Kwamo, producers of fashion apparel and accessories, including corsets, purses, shoes, tie-and-dye and batik fabrics.

Zara Adams (in white scarf), the QC; and Harold Addison, the Manager (in red shirt at back) with GSA officers

At each facility, the inspection team assessed production operations, hygiene and safety practices, labelling, and general compliance with applicable Ghana standards. Management of the companies expressed appreciation for the Authority's guidance and reaffirmed their commitment to maintaining product quality and regulatory compliance.

GS 984:2025 Wood and Wood Products – Semi-Manufactured Timber – Specification for Planed Timber and Mouldings

Scope:

This Ghana Standard for planed timber and mouldings establishes the general rules for the classification and grading of machined wood products. This standard further spells out the requirements for planed timber and mouldings intended for general application in joinery, furniture and similar products.

Why Do You Need This Standard?

Application of this standard by manufacturers ensures the production of safe and quality products, consistency in production output, protection of consumers' health and safety, enhanced competitiveness and reduction in losses.

Summary of Content:

This Ghana Standards provides manufacturers of Wood and Wood Products- Semi-Manufactured Timber with the specification for Planed Timber and Mouldings by providing information on normative references, terms and definitions, product type, general requirements, classification by grades, dimensions, grading provisions, species amending clauses, packaging and marking. **This standard has been technically reviewed. This is the third (3rd) edition. This edition cancels and replaces the previous edition GS 984: 2017 Semi-Manufactured Timber – Specification for Planed Timber and Mouldings.** The main changes are the revision of the recommended specie for the furniture: – **Appendix 1: Recommended Species for planed timber and mouldings.**

Technical assistance is provided to enhance understanding of the standard content.

This standard is available for **REFERENCE** and **SALE** at the Documentation and Information Centre, The Head Office, Ghana Standards Authority.
